For Immediate Release

Miller Blueprint Company – Becomes Certified Women-Owned Business Enterprise (WBE) & Historically Underutilized Business (HUB)

Austin, TX September 29, 2010

On September 22, 2010, Miller Blueprint Company became certified as a Women-Owned Business Enterprise (WBE) to participate in the City of Austin's Minority and Women-Owned Business Enterprise (MBE|WBE) Procurement Program. Additionally, earlier this month the State of Texas certified Miller Blueprint Company as a Historically Underutilized Business (HUB).

“Attaining WBE and HUB certification is an extremely important strategic initiative in our company's future growth plans,” said Luci Miller, President and Owner of Miller Blueprint Company. “Moreover, as President of Miller Blueprint Company I will ensure that we are a very active WBE and HUB participant in the City of Austin's and State of Texas' procurement process. We will work with the City of Austin, Small and Minority Business Relations Department (SMBR) and the State of Texas Comptroller's Office to aggressively pursue every contracting opportunity available to us.”

“Most importantly, our customers will benefit from our WBE and HUB certification,” said Bob Miller, Vice President of Miller Blueprint Company, and owner of G4 Spatial Technologies. “Their investment in Miller Blueprint Company's products and services can now be applied towards the WBE and HUB requirements of their public and private projects.”

About Miller Blueprint Company
